

Code execution instructions.

1. Include the ee456_imageformat.py, ee456finalproject.py and the 2 files from the DatasetLinks.docx file into the same folder.
2. Run the ee456_imageformat.py
3. After the completion of execution run ee456finalproject.py

Note: If you are saving the files labels.csv, category_annot.csv and X_data_edges.npz in in a different folder please use those paths in ee456finalproject.py and if you are using drive/different folder paths please replace the paths to dataset in ee456_imageformat.py form the initial lines.
